

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

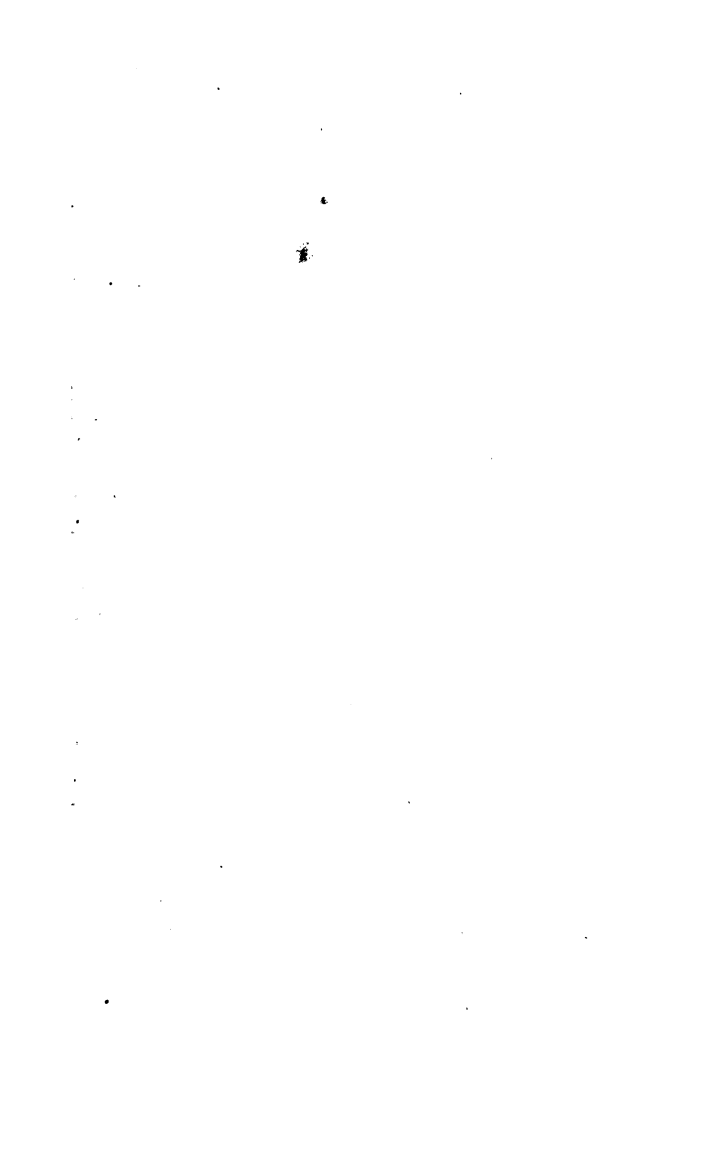

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

PREFACE.

SINCE the publication of the Treatise entitled 'PRACTICAL ORTHOGRAPHY,' the following pages have been drawn up, for the use of the pupils in those schools wherein the mode of instruction recommended in that Work may be adopted.

The pronunciation of words as dependent on the division of them into syllables, is not the object of this Work, nor of that to which it is introductory. Instead of furnishing the pupil with a formidable collection of materials, among which he is to play at cross purposes (perhaps for years) with syllables and sounds, it aspires simply to the office of training him by easy steps, for the practice of *writing words with proper letters*. This, however, is Orthography, a subject of itself sufficient for the employment of the young *tyro*, without being encumbered with adjuncts

~~The system here proposed,~~

cut short the business of the Spelling-book, and employ more profitably the time usually wasted in fruitless attempts to commit to memory words, which are filled with hard words for no better purpose than to grace its columns ; words, which are in the way of the younger classes, and which a Vocabulary will more properly supply to those more advanced.

Except in the case of blindness, in which the eye is a memory from sounds alone, are tra

erroneous spelling of a word is frequently discovered at the first glance, from its unusual appearance only and before time has been allowed to examine it in detail. Hence it is, that the most easy and expeditious mode of teaching orthography, is that of exercise written on slates or paper by pupils, as dictated to them from books. This practice, among the careless and inattentive, (a class not the least numerous,) is the only efficient one; for it brings their errors so repeatedly under review, as to convince them that industry is less troublesome than perpetual blundering. Yet notwithstanding this practice is of such indispensable use in an English school, it is not always crowned with entire success. The plan is not pursued to the extent, and some of the best purposes to which it is applicable, are lost to the learner. A more expanded view of the subject is now before the public; in which its application to Composition, as well as to Orthography, is recommended to the notice of the judicious tutor. *

Practical spelling on paper or on slates, however,

* Vide Practical Orthography, Part 1.

cannot be introduced till the pupil has made such advances in writing, as to be able to form words in legible characters. In the mean time, oral spelling may be employed: first, on words of very common use in which the orthography and pronunciation agree; and secondly, with words of the most common use among those wherein they differ. Collections of such words, it is the province of this work to supply.

A Spelling Book on so contracted a scale, will appear under great disadvantages to those who are well acquainted with the great superiority of dictation (when carried to its full extent) over the common practice of spelling by rote; because they are not aware that the pupil's Vocabulary, or manuscript repository of his corrected errors, is his spelling book, and that it has the singular merit of exhibiting selection of such words only, as *he ought to have been able to spell*, but which *he could not spell*, and which *he must spell*, and fix in his memory, before he can be rid of their tiresome recurrence. This selection *the produce* of his dictation exercises, with the *addition of such other* of his misspelled words as c

be discovered in his writing, on whatever occasion his pen is employed; and, as it is constantly increasing, there is no want of work: nor will there be a want of variety, if the exercises for dictating be properly selected, and adapted to the ages and abilities of the different classes of pupils.

It may be asked how learners are to be taught to pronounce words, when the business of the spelling book is thus contracted? To this question may be opposed another: Does the division of words into syllables generally determine their pronunciation? If not, what is its use beyond that of adjusting the lines of pages in printing? (a matter not much attended to in writing!) If then, after all, we are obliged to have recourse to a dictionary, not only for the meaning, but also for the pronunciation of the words we use,* might not the time commonly so profusely spent in

* Pronunciation may be taught by lessons read in classes from a pronouncing dictionary. This will make the pupils expert in the use of the characters employed by the author and render the consultation of the dictionary easy and pleasant to them.

of more consequence than some mere scholar's 'task book' does not appear formidable in size. There is something in the thin pocket manual, while the filled volume strikes terror into his senses that ardour which would have cheerfulness, through a less appalling reason, the following Work is not encouraged, which are rather to be considered a deterrent, than of practical use to the scholar, and amply supplied by the spelling

intended that the pupil shall not do more than *name the letters* of the words, as they are correctly pronounced to him by the teacher. This kind of spelling is so nearly assimilated to that of manuscript, (which is the ultimate object of spelling,) and the gradation so natural and easy, compared with the mode of sounding each syllable separately and afterwards uniting them to form words, that the spelling book thus used, will become, what it has seldom the opportunity of being, a real footstep to *the orthography of the pen*.

Words of many syllables, being frequently compounded of shorter words, prepositions, terminations, and other additional syllables, are omitted, because the spelling of such words is much better learned by dictating. And the teacher would find a considerable advantage in *dictating* a portion of the SECOND PART to a whole class, to be written on slates, instead of *hearing it repeated* by each individual as a task.

In the list of words of similar sounds, but of different spelling and signification, the usual arrange-

ment is preserved ; but in giving out those w
either for oral or manuscript spelling, the te
should not follow the order in which they are pri
but take them promiseuously, separating each
from its companion, that the learner may not pr
by guess. In the Practical Orthography, a mor
tensive collection of words of this sort is formed
exercises for dictating, to which the present l
intended to be preparatory.

The other lists of words in the Appendix, n
of service to the young student in his early att
at letter-writing.
